IP Surveillance Solutions

Making Society's Most Trusted Intelligent Surveillance Solutions

VIVOTEK Inc. (TAIEX: 3454) is a global, R&D-driven IP surveillance solutions developer that aims to provide the most trusted intelligent surveillance solutions to society. Due to the company's expansive technological capabilities in image and audio, distributors and system integrators count on VIVOTEK to address end users' needs for intelligent security, control, and management solutions. The company specializes in IP cameras, network video recorders, video management software, and intelligent edge AI video analytics.

Founded in Taiwan in 2000, VIVOTEK has formed strategic alliances worldwide, and works with over 180 authorized distributors across more than 100 countries. The company has established offices in the U.S., the Netherlands, India, Mexico, and Japan. For more information, please visit www.vivotek.com.

Environmental Commitment

With the increasing environmental challenges of our time, VIVOTEK is deeply aware of the importance of coexisting with the environment for sustainable development. VIVOTEK has implemented a comprehensive, eco-friendly manufacturing policy applied to the product design, component selection, production, quality testing, packaging and shipping processes, effectively minimizing our carbon footprint on the environment. Together, we can be responsible stewards of a vibrant and sustainable future.

Quality Certifications

Green Design Guidelines

- HSF Eliminating the use of hazardous substances
- WEEE Easy disassembly and recycling
- ErP Eco-design

Advanced Technology

Smart Stream III

VIVOTEK Smart Stream III combines Smart Codec, Dynamic Intra Frame Period, Scene Awareness and Smart FPS technologies to enable the cameras to optimize quality for desired regions and automatically adjust encoding, maximizing bandwidth usage efficiency and lowering storage requirements while maintaining high image quality.

Security at the Edge

Secure Boot

Secure boot is a mechanism that protects the firmware of the product installed by VIVOTEK. During the camera boot up process, secure boot ensures that unauthenticated code is rejected and protects the camera system from attacks or infections by malicious external code.

Signed Firmware

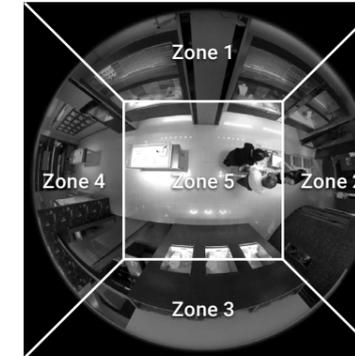

VIVOTEK's signed firmware requires a digital signature in the firmware and verification of the signature by VIVOTEK, thereby ensuring that users can trust the firmware has not been tampered with. A device with signed firmware can validate the firmware before allowing installation.

Smart IR II

Adaptive IR

The best possible IR image via adjusting IR illuminators to the scene (simultaneously or individually).

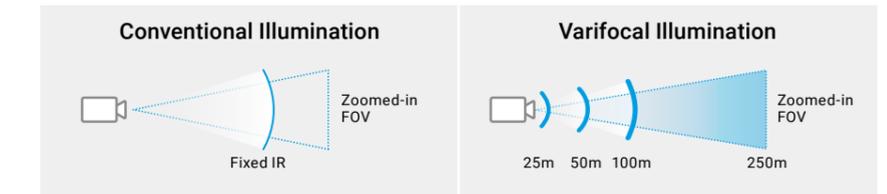

- Independent IR control for regional illumination
- Background clarity
- Automatical IR dimming
- Reduce glaring hotspots or underexposed dark regions

Vari-Angle IR

Automatic IR angle adjustment to the optical zoom provides consistent IR images in all fields of view.

- Effortless IR angle adjustment
- Wide coverage of field of view
- No IR hot-spot issues
- Long-range IR illumination

SNV II

SNV stands for Supreme Night Visibility. VIVOTEK SNV II-label products incorporate carefully selected quality optical components and sophisticated image signal processing algorithms to reproduce high quality color images, even in very low-light conditions.

Installation Aids

Various Helpful Features to Simplify the Installation Process

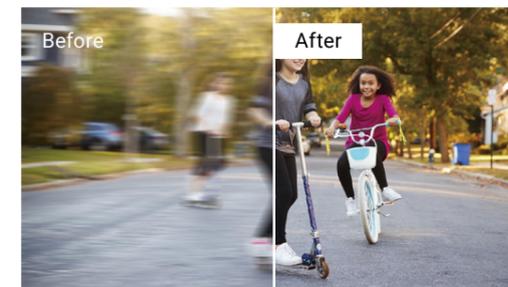

Installation-friendly Modular Mechanical Design

VIVOTEK's brand new mechanical design has made the installation easy and hassle-free than ever. With the modular design, installers can save tons of time and cost, focus on the service and upgrade.

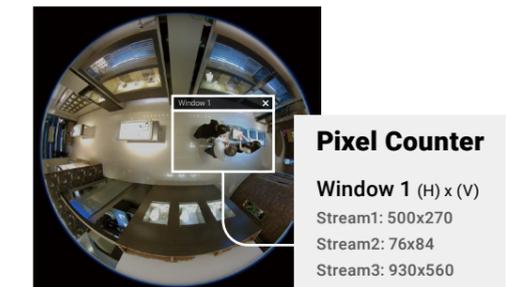

Direct Network Access for Installation via USB Wi-Fi Adapter

Speed Focus for Clear Image Around the Clock

Automatic IR Angle Adjustment for Best Possible IR Image

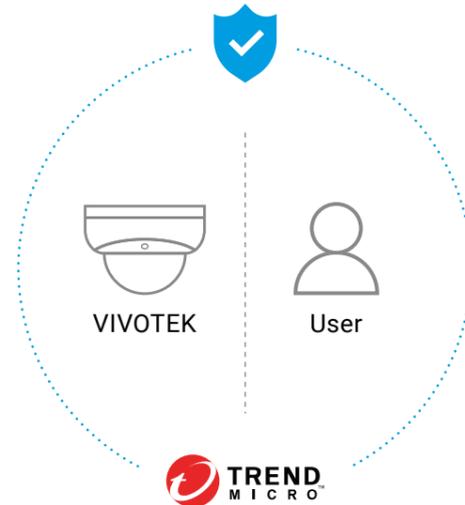

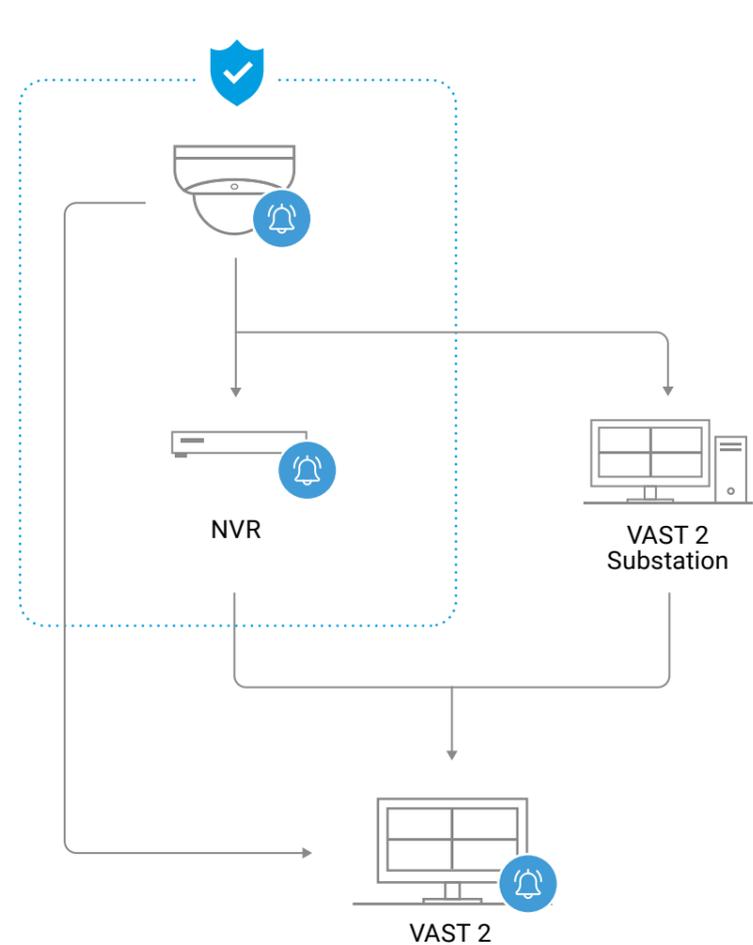

Visual Pixel Calculator for Handy Operational Requirements Achievement

Security within Security

Cybersecurity Management Solution

VIVOTEK's cybersecurity assurance efforts are built into the lifecycle of its products, including development, verification, manufacturing, delivery and service. We are constantly evaluating and enhancing our cybersecurity efforts in order to provide our valued customers with the highest quality and most reliable products. By cooperating with the world-renowned cybersecurity company, Trend Micro, and announcing the hardening procedure to users, VIVOTEK is committed to helping minimize and stop such events to our customers and VIVOTEK products.

Multi-Layer Protection Solution for Surveillance Cameras

Multi-Layer Protection with Trend Micro IoT Security

Multi-Layer Protection including Brute Force Attack Detection, Intrusion Detection and Prevention, and Instant Damage Control will automatically secure your network system with the latest signature upgrades.

Cybersecurity Alarm Management with Instant Alerts

Once event notifications in network cameras and VAST 2 VMS have been set up, VIVOTEK's surveillance solution will be immediately alerted when cyberattacks occur.

Event Reports with Cyber Risk Dashboard

Quickly know attack trend and status, and acquire attack information in order to diagnose your network promptly on VIVOTEK's VAST 2 VMS and NVRs.

3D Counting

VIVOTEK offers high-accuracy visual counting solutions for retail and security intelligence.

RECOMMENDED

Retail

Accurately obtain people-counting data and optimize management decisions. With the further capability of stitching multiple counting cameras together, users can efficiently manage systems covering expansive floor plans.

SC8131

Transport

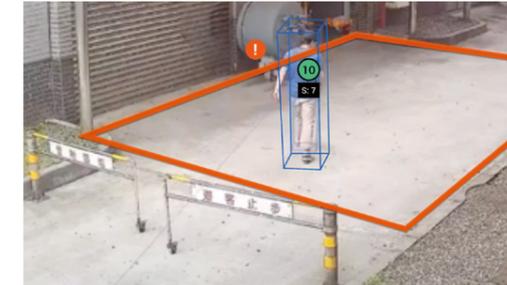

3D Automatic Passenger Counting (APC) is purpose-built for onboard rolling stock and transit vehicle applications, empowering users to receive valuable passenger-flow data for route schedule and ticketing optimization.

SC8132

SC8133

Smart VCA

The on-board Smart VCA suite includes 8 advanced video analytics, it allows the smart-edge cameras to offer advanced accuracy in people and object detections, the rich rules and easy configurations are provided to meet diverse user application requirements.

- Crowd Detection
- Line Crossing Detection
- Intrusion Detection
- Loitering Detection
- Missing Object Detection
- Unattended Object Detection
- Face Detection
- Running Detection

Smart Motion Detection

Recognize human activities with precision, with no negative impact from change of lighting, adverse weather, or other factors. Smart Motion Detection results in a significant reduction of false alarms and the continued intelligent protection of people.

Smart Tracking

Smart Tracking is an innovative Deep Learning Technology for VIVOTEK's new PTZ cameras designed to increase effectiveness when automatically tracking people in motion. It is especially effective for applications and times in which individuals require special attention, such as bank vaults, or parking garages after working hours.

180° Panoramic Cameras

End to End Coverage with VIVOTEK Panoramic Cameras

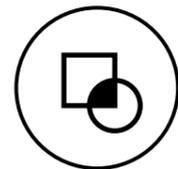

180° Views

Through a single fisheye lens or multiple sensors stitched together, VIVOTEK panoramic IP cameras provide excellent 180° coverage to cover open areas

WDR Pro Technology

WDR Pro technology enables image clarity in high contrast environments, essential for panoramic cameras' super-wide FOV

Variety

VIVOTEK offers 180° panoramic coverage in small and large form factors, ensuring a solution for all situations

The dynamic range is higher than 140dB. *SNV Supreme Night Visibility, by professionally integrating superior optical components and sophisticated video algorithms, SNV cameras present Supreme Night Visibility in low light conditions. *i-CS Intelligent CS-mount lenses can be used for add-on value functions, ex. remote zoom focus control, distortion correction, shading correction, etc. *AEB (Auto Exposure Bracketing) Provides multiple streams with different exposure settings to cover over-exposed and under-exposed scenarios.

Fixed Dome Cameras

Supporting An Array of Environments From Indoor to Outdoor, From Small Retail Shops to Smart City Surveillance

AI-Powered Video Analytics*

VIVOTEK's Smart VCA is a suite of multiple analytics that provide faster and more accurate detection for various scenarios

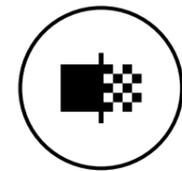

Smart Motion Detection*

With brilliant precision of human activity detection and intelligent neglect of background changes in a scene, VIVOTEK's SMD minimizes the number of false alarms effectively

Robust Cyber Protection

Empowered with firmware encryption and utilizing the expertise of Trend Micro, VIVOTEK provides robust cyber protection with affordable prices, catering to most user scenarios

Significantly Lower Bandwidth via Smart Stream III

Fully compatible with H.264 and H.265, VIVOTEK's Smart Stream III allows reducing bandwidth consumption up to 90%

General			
Power Input/ Consumption	DC 12V/ PoE Max. 7 W	AC 24V (Optional)/ DC 12V/ PoE TBD	PoE Max. 12.95 W (IR on) Max. 9 W (IR off)
Housing	IP66, IP67, IK10	IP66, IP67, IK10, NEMA 4X	IP66, IK10
Dimensions	Ø155 x 104 mm	TBD	Ø133.3 x 103.8 mm
Operating Temperature	-20°C ~ 50°C (-4°F ~ 122°F)	-40°C ~ 60°C (-40°F ~ 140°F)	-30°C ~ 60°C (-22°F ~ 140°F)

* All specifications are subject to change without notice.

*WDR Pro Captures alternate frames using different exposure times, combining them into a single image. The dynamic range is between 100dB and 140dB. *WDR Pro II Captures alternate frames using different exposure times, combining them into a single image. The dynamic range is higher than 140dB. *SNV Supreme Night Visibility, by professionally integrating superior optical components and sophisticated video algorithms, SNV cameras present Supreme Night Visibility in low light conditions. *i-CS Intelligent CS-mount lenses can be used for add-on value functions, ex. remote zoom focus control, distortion correction, shading correction, etc. *AEB (Auto Exposure Bracketing) Provides multiple streams with different exposure settings to cover over-exposed and under-exposed scenarios.

Bullet Cameras

Designed for Outdoor Surveillance and Support A Wide Range of Monitoring Distances

AI-Powered Video Analytics*

VIVOTEK's Smart VCA is a suite of multiple analytics that provide faster and more accurate detection for various scenarios

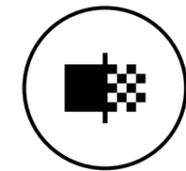

Smart Motion Detection*

With brilliant precision of human activity detection and intelligent neglect of background changes in a scene, VIVOTEK's SMD minimizes the number of false alarms effectively

Robust Cyber Protection

Empowered with firmware encryption and utilizing the expertise of Trend Micro, VIVOTEK provides robust cyber protection with affordable prices, catering to most user scenarios

Significantly Lower Bandwidth via Smart Stream III

Fully compatible with H.264 and H.265, VIVOTEK's Smart Stream III allows reducing bandwidth consumption up to 90%

RECOMMENDED

IZ9361-EH

- 2MP, 60fps @ 1920x1080
- WDR Pro
- 20x Optical Zoom with Auto Focus
- 150 Meters Smart IR II (Adaptive IR)
- IP67, IK10, NEMA 4X

IB9367-EHT-v2

- 2MP, 60fps @ 1920x1080
- WDR Pro
- Smart VCA
- Secure Boot Supported
- Signed Firmware Supported

NEW

* Available on selected models

Box Cameras

Equipped with Different Lens Options, Ideal for Video Surveillance Applications

SNV(Supreme Night Visibility)

VIVOTEK's SNV technology allows capture of the highest quality full-color images even in low light environments

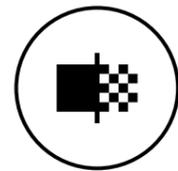

WDR Pro Technology

WDR Pro technology enables image clarity in high contrast environments, essential for box cameras' remote back focus lenses

Robust Cyber Protection

Empowered with firmware encryption and utilizing the expertise of Trend Micro, VIVOTEK provides robust cyber protection with affordable prices, catering to most user scenarios

Significantly Lower Bandwidth via Smart Stream III

Fully compatible with H.264 and H.265, VIVOTEK's Smart Stream III allows reducing bandwidth consumption up to 90%

RECOMMENDED

IP9165-HT

- 60 fps @ 1920x1080
- 3.9 ~ 10 mm, Remote Focus, i-CS Lens (Intelligent-CS)
- SNV II, WDR Pro II, Smart Stream III
- DIS (Digital Image Stabilization)
- Video Rotation for Corridor View

IP9181-H

- 30 fps @ 2560x1920, 60 fps @ 1920x1080
- 1/1.8" Progressive CMOS Sensor
- DIS (Digital Image Stabilization)
- SNV, WDR Pro, Smart Stream III
- Remote Back Focus for Easy Focus Adjustments

Mobile Dome Cameras

Trusted and Reliable Solution for Onboard Rolling Stock

Reliability and Rugged Design

Cameras are built and tested to endure harsh operating conditions including extreme temperatures, mechanical impact and vibrations, and feature streamlined rugged metal housings with high IP and IK ratings to ensure maximum reliability for security monitoring in any environment

Industry Standards and Certifications

Designed for transport applications, VIVOTEK's mobile dome cameras are compliant with the strictest norms and regulations required by international law and transportation authorities

RECOMMENDED

MD9581-H

- 30 fps @ 2560 x1920
- 25M IR
- IP66, IP67, IK10, NEMA 4X
- Compliant with EN50155 OT2 and EN45545

MD9561-H

- 60 fps @ 1920 x1080
- 30M IR
- IP66, IP67, IK10, NEMA 4X
- Compliant with EN50155 OT2 and EN45545

Thermal Bullet Cameras

Long Distance Monitoring

VIVOTEK's thermal cameras offer different lens options to allow users to easily adapt to diverse detection scenarios

Robust Design for Outdoor Environments

Cameras are IP66/IP67 rated and equipped with NEMA 4X housings. This unique lens guard design provides extra protection from unexpected shock or impact

Video Analytics for Perimeter Protection

VIVOTEK's thermal cameras, with video analytic features such as line crossing, and field detection, make perimeter protection both simple and efficient

*WDR Pro Captures alternate frames using different exposure times, combining them into a single image. The dynamic range is between 100dB and 140dB. *WDR Pro II Captures alternate frames using different exposure times, combining them into a single image. The dynamic range is higher than 140dB. *SNV Supreme Night Visibility, by professionally integrating superior optical components and sophisticated video algorithms, SNV cameras present Supreme Night Visibility in low light conditions. *i-CS Intelligent CS-mount lenses can be used for add-on value functions, ex. remote zoom focus control, distortion correction, shading correction, etc. *AEB (Auto Exposure Bracketing) Provides multiple streams with different exposure settings to cover over-exposed and under-exposed scenarios.

LPC Cameras

From the Highest Levels of Glare to the Darkest Hours in the Night

Capture Vehicle Speeds up to 155MPH (250 km/h)

VIVOTEK's Freeway LPC camera adopts a 3-Megapixel global shutter sensor combined with built-in corresponding 24W pulse mode IR LEDs. The camera can provide clear license plate images for reliable recognition in high-speed traffic applications

Single Camera Coverage of Both Scene Overview & LPC View

VIVOTEK's 2 Mega-pixel resolution kit provides not only sufficient PPF for license plate capture, but also for a clear overview of moving vehicles, including car color, brand and type, for general traffic surveillance purposes

Supreme Anti-Glare Capability

Capturing images at night is a challenging issue for any surveillance application, but for LPC applications the challenge is even greater due to the noise and glare caused by the headlights of cars

RECOMMENDED

IP9172-LPC(Freeway)

- Capture Vehicle Speeds of up to 155MPH (250 km/hr)
- Global Shutter Camera and Pulsed Mode IR Illuminator
- Supreme Anti-Glare Capability
- Automatic Exposure Bracketing Function (AEB)

IP9165-LPC Kit

- Capture Vehicle Speed up to 110MPH (180km/hr)
- One Camera Covers Both Scene Overview & LPC View
- Supreme Anti-Glare Capability
- One Camera Covers Dual Lanes

LPR Cameras

Forging Alliances with Global Leaders in LPR Software Develop Solutions to Capture License Plate Images for LPR Applications

Stop & Go Application on Edge LPR Solution

The VIVOTEK on Edge LPR solution can identify license plates from over 70 countries or states simultaneously. It also converts number plates into Wiegand signals for use with an access control system, and offers various APIs for integration with 3rd party systems. The Stop & Go application on Edge LPR solution is ideally applied for parking access control and Stop & Go toll systems or any LPR applications where a vehicle stops or comes to an almost complete stop

Urban Application on Edge LPR Solution

The Urban application on Edge LPR solution inherits all the best from the Stop & Go application, but in addition can capture clear plate images and LPR readings from vehicles moving at speeds of up to 60MPH (90km/hr). Additionally, to provide precise, reliable, and authoritative data for use as evidence, it can simultaneously combine the LPR result and a snapshot of the linked camera. This feature is beneficial for law enforcement agencies, such as the police and government. The Urban application on Edge LPR solution is an ideal option for city surveillance, residential communities, and expressway toll-management applications

RECOMMENDED

IB9365-LPR

- Embedded Access Control Application
- 70+ Countries' License Plates Supported
- Black and White Lists for License Plate Verification
- Centralized List Management in Single Camera

IP9165-LPR Kit (Street)

- Embedded LPR Software for Urban/Road Applications
- Capture Vehicle Speed up to 60MPH (90km/hr)
- 70+ Countries' License Plates Supported
- Taking Snapshots from Another Related Overview Camera as Evidence Images

*WDR Pro Captures alternate frames using different exposure times, combining them into a single image. The dynamic range is between 100dB and 140dB. *WDR Pro II Captures alternate frames using different exposure times, combining them into a single image. The dynamic range is higher than 140dB. *SNV Supreme Night Visibility, by professionally integrating superior optical components and sophisticated video algorithms, SNV cameras present Supreme Night Visibility in low light conditions. *i-CS Intelligent CS-mount lenses can be used for add-on value functions, ex. remote zoom focus control, distortion correction, shading correction, etc. *AEB (Auto Exposure Bracketing) Provides multiple streams with different exposure settings to cover over-exposed and under-exposed scenarios.

Speed Dome Cameras

All-inclusive Solutions for Great Video Quality in Challenging Lighting Conditions from Indoor to Severe Outdoor Environments

Vari-Angle IR

Automatic IR range adjustment to match optical zoom provides consistent IR images in all fields of view

Smart Tracking*

Innovative deep-learning algorithm to increase accuracy when tracking people in motion

Outdoor Ready

Designed for outdoor environments with IP66 and IK10 certification as well as NEMA 4X

RECOMMENDED

SD9374-EHL

- 4MP 2560x1440
- 36x Optical Zoom
- 250m VAIR
- Smart Tracking

SD9366-EH-v2

- 2MP 1920x1080
- 30x Optical Zoom
- 250m VAIR
- NEMA 4X

* Only SD9374-EHL supports Smart Tracking

Accessories

*WDR Pro Captures alternate frames using different exposure times, combining them into a single image. The dynamic range is between 100dB and 140dB. *WDR Pro II Captures alternate frames using different exposure times, combining them into a single image. The dynamic range is higher than 140dB. *SNV Supreme Night Visibility, by professionally integrating superior optical components and sophisticated video algorithms, SNV cameras present Supreme Night Visibility in low light conditions. *i-CS Intelligent CS-mount lenses can be used for add-on value functions, ex. remote zoom focus control, distortion correction, shading correction, etc. *AEB (Auto Exposure Bracketing) Provides multiple streams with different exposure settings to cover over-exposed and under-exposed scenarios.

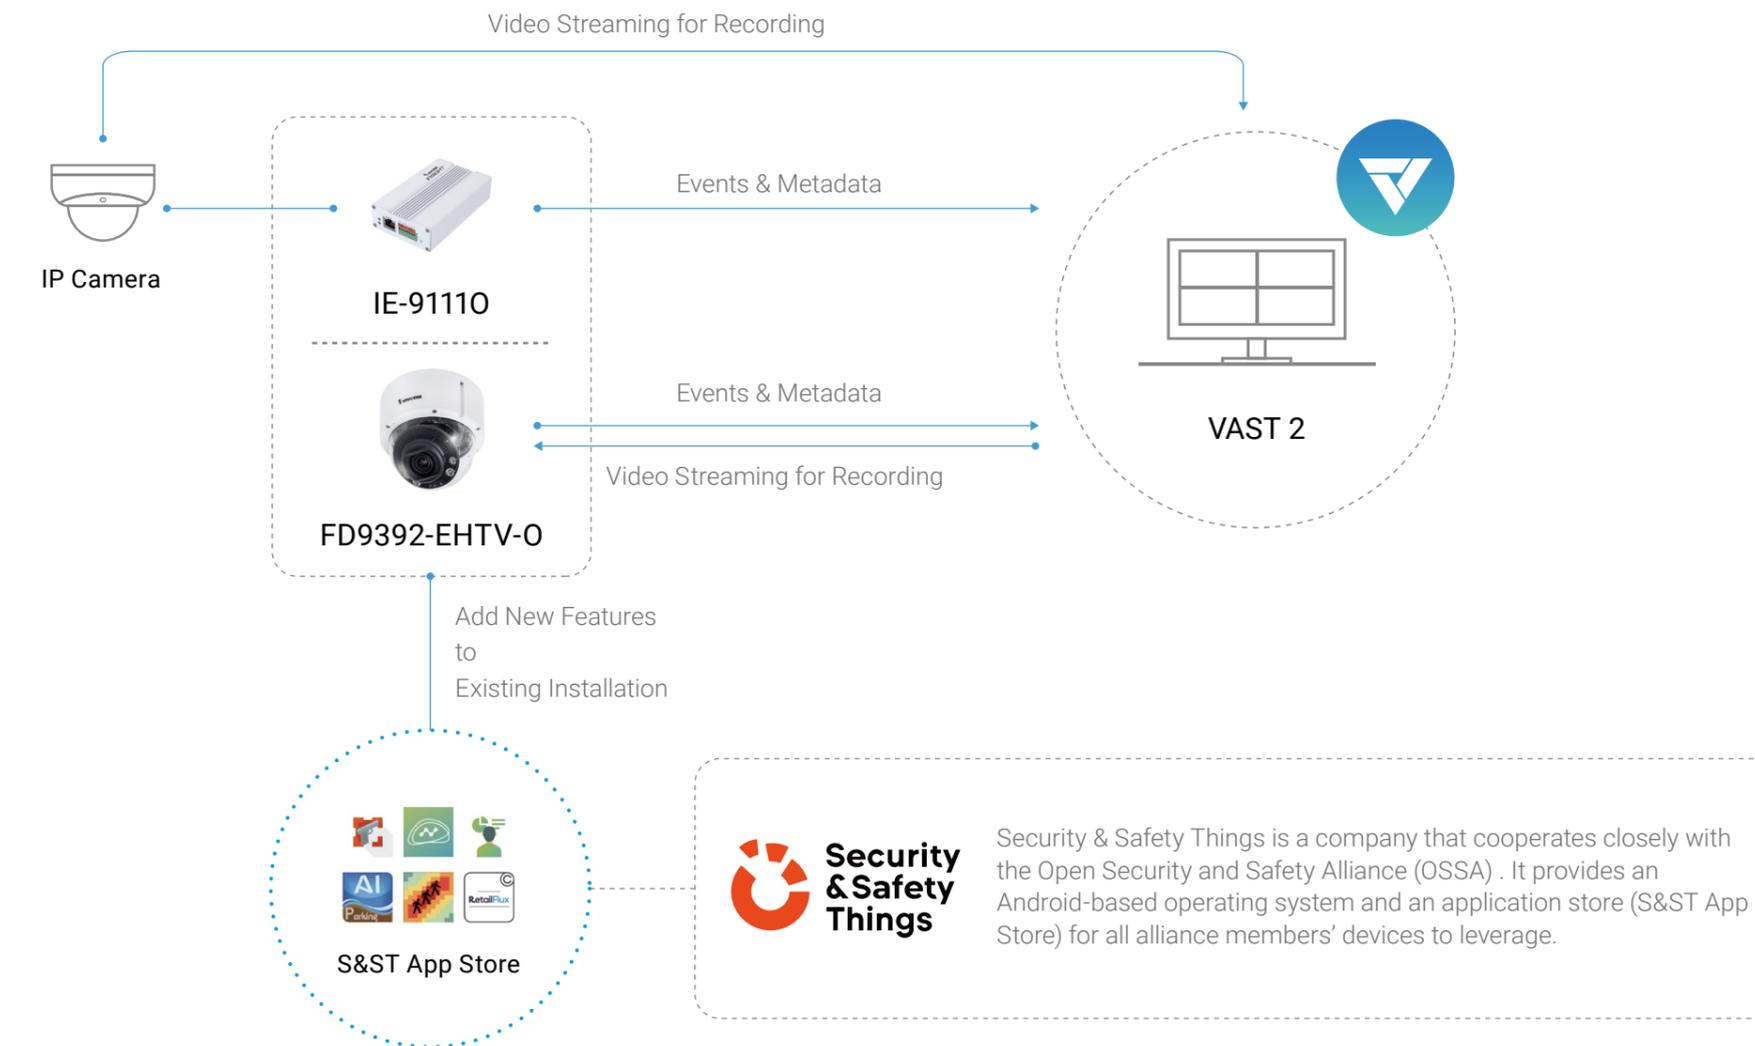

AIoT Surveillance Solution

Empowering AI on Surveillance Systems

VIVOTEK debuts its iNSIGHT series solutions driven by the Open Security & Safety Alliance. OSSA® is founded by VIVOTEK and 4 leading companies in IP surveillance industry. The iNSIGHT series solutions represent the future of implementing an open platform in physical surveillance products, enabling system integrators, software application developers and users to cooperatively create in an open, efficient, and intelligent AI video age.

Upgrade your Network Cameras to AIoT Devices via Clicks

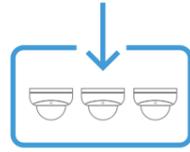

Hasten your Time to Market with Ease

Reduce development time

Eliminates the need to develop apps individually for specific cameras. You can now simply install diverse apps from the S&ST App Store.

Deploy AI technologies on demand

Discarding the difficulties of development, you can now pick the right apps that fulfill your needs from the App store, discover the world of AI technology anytime, and remove them on demand.

Secure your systems anytime, anywhere

All the OSSA devices and Apps are certified to assure cybersecurity, protecting your data & privacy. The database & new features can be updated online.

Applications

Pantograph Security

Face Mask Detection

Retail (Counting / Heatmap)

PPE Inspection

Seat-Occupancy Detection

Gun Detection

Fire and Smoke Detection

Driven by OSSA

Naming Rule

For NVR Model

1-2 nd Model Category	
Code	Description
NR	Rack Mount Type Network Video Recorder (Include Rack Mount Kit)
ND	Desktop Type Network Video Recorder (Without Rack Mount Kit)
NV	Vehicle Type Network Video Recorder
RX	Network Receiver
NS	Network Station (CMS Station)

3 rd A/V Type	
NO.	Description
8	H.264 / MJPEG
9	H.265 / H.264 / MJPEG

4 th Amount of Channel	
NO.	Description
2	2 to the power of 2 = 4 Channels
3	2 to the power of 3 = 8 Channels
4	2 to the power of 4 = 16 Channels
5	2 to the power of 5 = 32 Channels
6	2 to the power of 6 = 64 Channels
7	2 to the power of 7 = 128 Channels

5 th ND/NV/RX Series - HDDs	
NO.	Description
0	No HDD
1	1 HDD
2	2 HDDs
3	3 HDDs
4	4 HDDs
5	5 HDDs
6	6 HDDs
7	7 HDDs
8	8 HDDs
9	9 HDDs

*e.g., 5th no.=8; 6th no.=2, Total HDD= 8 x 2= 16

5 th NR Series - HDD Group	
NO.	Description
8	8 HDD for 1 Group

6 th Revision for ND/NV/RX Series	
NO.	Description
1~9	Not Specified

6 th Revision for NR* Series	
NO.	Description
1~9	Multiplied by the Number of HDD Group

7 th Extension/Feature for ND/NV/RX	
NO.	Description
P	PoE
W	Wireless Application

7 th Extension for NR/NS Series	
NO.	Description
(A)	New version

8 th Digit Extension	
NO.	Description
v	1 - 99

Core+

Advanced Firmware for NVR

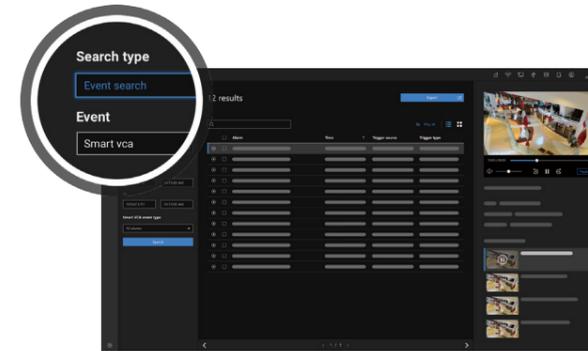

Cybersecurity Management

In alliance with world-renowned cybersecurity company Trend Micro, Core+ NVRs support Trend Micro IoT Security, empowering the NVRs to automatically detect and prevent credential-based attacks and to block suspicious events. VIVOTEK network cameras that support Trend Micro IoT Security can also connect in series with Core+ NVRs, enabling the NVRs to receive instant notifications of the security events from the cameras and to understand the type and status of cyber-attacks, as well as to acquire attack information from cameras. In addition, VAST 2 (VMS) receives information on security protection attacks from Core+ NVRs and VIVOTEK cameras.

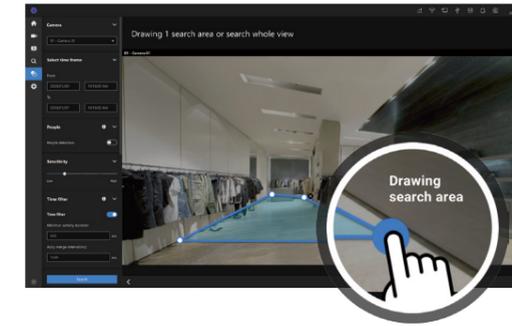

VIVOTEK Core+ is the new generation ND series network video recorder firmware, embedded with VIVOTEK's latest technology including features such as cybersecurity management, Smart VCA event search, Smart Search II functions, and counting solutions. Upgrade your network video recorder's ability to Core+ for a smarter, safer and smoother user experience.

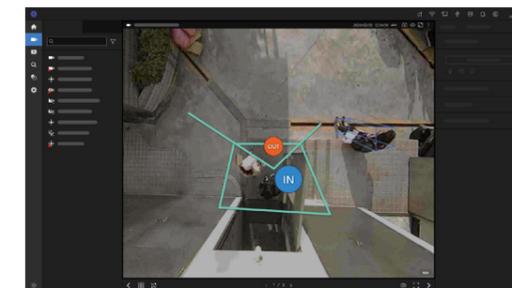

Smart VCA Event Search

The Core+ NVRs support alarm management and event search of VIVOTEK's deep-learning video analytics technology - Smart VCA. VCA rules and information such as people-tracking frames and motion-detection frames can be shown on live or playback video display. The user can search by single or multiple event types, playback triggered events and then export these search results to video clips.

Smart Search II

Cameras supporting VIVOTEK Smart Motion Detection technology, which detects people activities, can also connect with Core+ NVRs. Based on the camera metadata recorded on the hard drive of the NVRs, the NVRs can then deploy the advanced Smart Search II technology, activate the people detection function, and proceed to search the corresponding playback video. This allows for faster sorting through large amounts of evidence to find precisely what is needed.

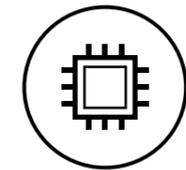

Counting Solution

The Core+ NVRs support VIVOTEK's 3D people counting cameras and cloud service software – VIVOCloud. Counting rules can be shown on the NVR's video display from counting cameras. Besides, all of the counting data can be stored automatically to the NVR's hard drive as well as be acquired by VIVOCloud. Users can also build customized counting reports through the VIVOCloud interface. This enables tracking of in-store guest flow and benchmarking of campaign performance between different stores or across different time frames to make business more efficient.

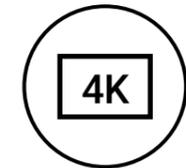

Desktop NVR

Intelligent Features and Cybersecurity Protection, Ideal for Middle-large Scale Systems and General Surveillance

Core+

VIVOTEK Core+ supporting Smart VCA, Smart Search II and Cybersecurity Management, offering a smarter and smoother user experience

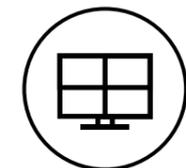

4K Display

H.265/H.264 supported, 4K decoding and local display for clear and vivid monitoring

RAID Supported*

RAID 0/1/5 configuration provides further data security in rare event of a hard drive failure

CMS Management

License-free for VIVOTEK VAST 2 CMS management, empowering users to set up and manage surveillance systems with ease

RECOMMENDED

ND9441(P)/ ND9541(P)

- H.265 16/32CH 4 bay NVR series
- Decoding 1080p x480fps
- RAID 0/1/5
- 802.3 at/af PoE x16, 1 60W total (for PoE model)

ND9322P-v2/ ND9424P-v2

- H.265 8/16CH 2 bay NVR series
- Decoding 1080p x120fps
- RAID 0/1
- 802.3 at/af PoE x8/16, 120W/200W total

* Available on selected models

Rack Mount NVR

Superb Performance and Reliability for Large Scale Systems

Enhanced Decoding Capability

H.265/H.264 supported with enhanced decoding capability for high resolution video cameras up to 20MP

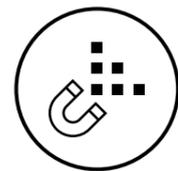

Hot-Swappable HDD

Supports Hot-Swappable HDD bays with RAID 0/1/5/6/10, and NVR failover for reliable and secure recording data

Embedded VAST 2

Built-in VIVOTEK VAST 2, supporting various VIVOTEK solutions such as Smart VCA, Cybersecurity Management, Transportation, and License Plate Recognition

Data Magnet Solution

Embedded free Data Magnet for easy integration with 3rd party devices and software

RECOMMENDED

PoE Network Products

PoE Network Products

A full range of applications designed for video surveillance system, including power-surge prevention from lightning strike damage, network management, multiple topology views for cameras, and more.

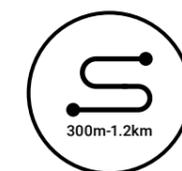

Network & PoE Management

L2 Network Function
PoE on/off Control for Each Port
Cable Diagnostic

Industrial & Outdoor Ready

Wide Temperature Support
IP67 and IK10 Certified
Built-in Surge Protection

Long Range PoE Extension

300m~1.2km PoE Delivery
Daisy Chain and Ring Connection
Support Multiple Cameras with Single Power Source

Video Management Software

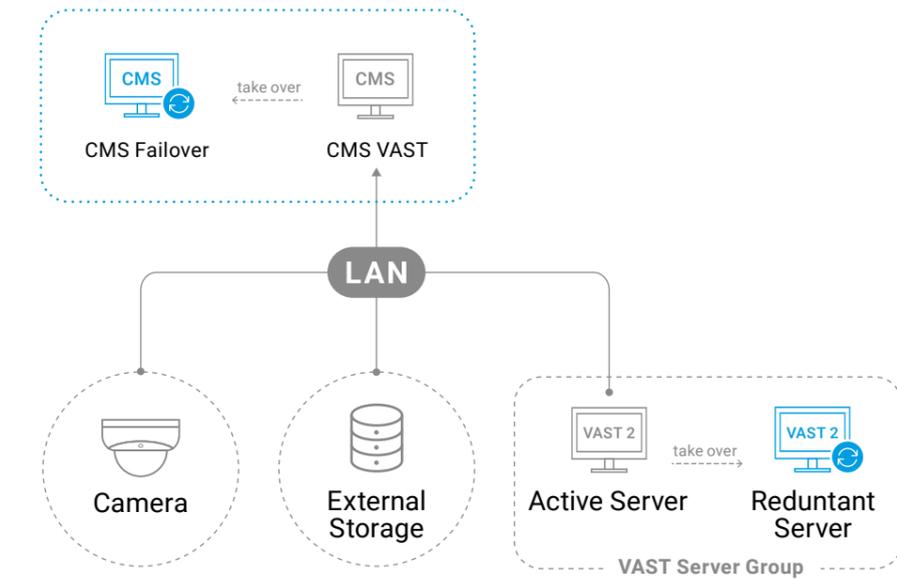

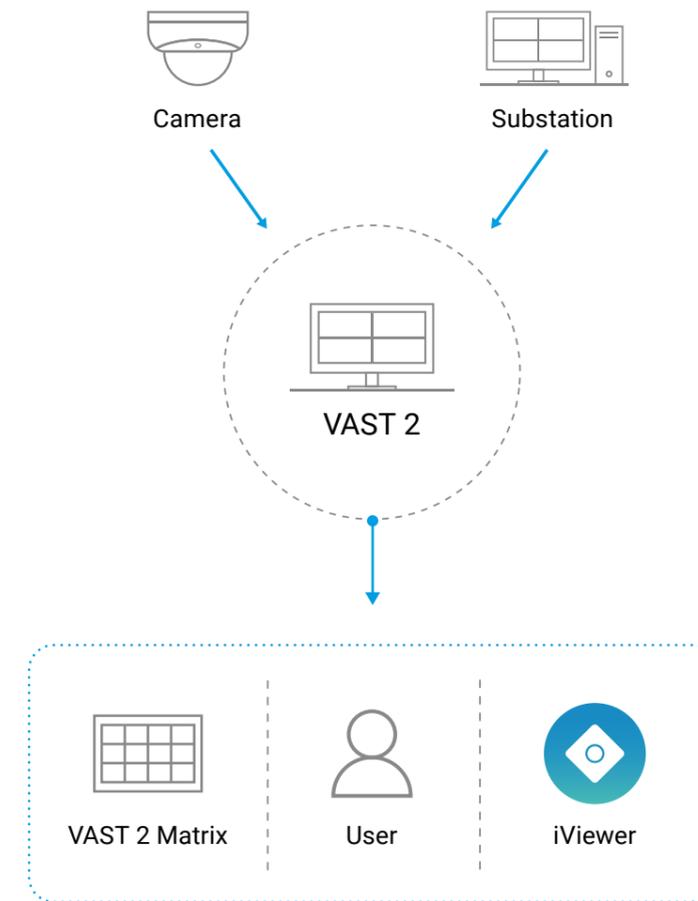

VAST 2

VAST 2 is an easy to use IP video management software (VMS), provides easy operation on single or multiple monitors, rapidly export multichannel video clips and acquired VCA analytics with integrated cameras. With a wide range of add-on solutions, VAST 2 is the perfect VMS for use in retail, banking, transportation, and industrial applications.

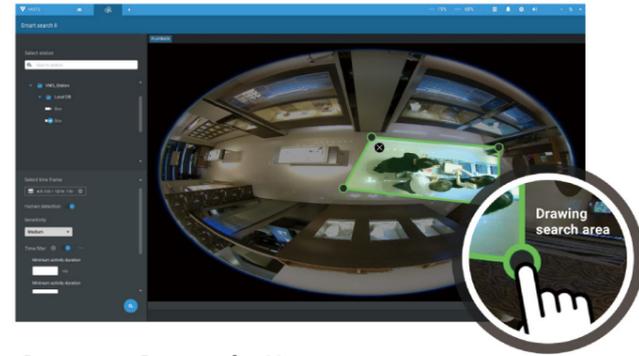

VAST 2

Change the Way You Experience VMS

CMS / VMS Failover

In the event of server failures, redundant servers become active and automatically take over the recording task. Besides, recording and management tasks will be transferred from CMS to a CMS redundant server if CMS service becomes unavailable.

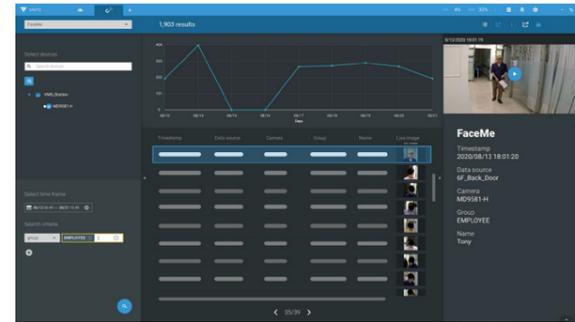

Smart Search II

Users can quickly sort through large amounts of footage to find object or person-related motion in video streaming storage. Human behaviors such as crossing a user-defined area, loitering in an area for a set time and intruding into/leaving from a zone can all serve as search criteria. Video clips can be easily found and exported.

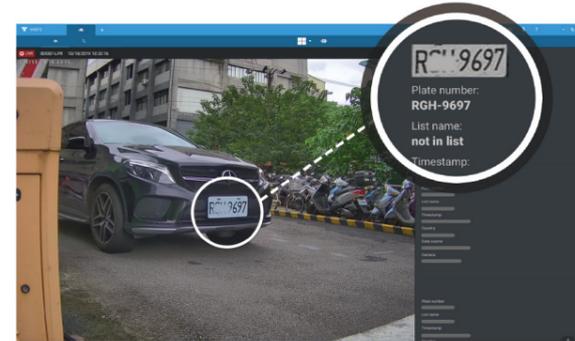

Cybersecurity Management Solution

VAST 2 provides cyber alert notifications and a real-time cyber risk dashboard to easily identify common types of cyberattacks. Users can take a further step to filter attack logs through different criteria, making it quicker to find abnormal events from among a large number of records.

Data Magnet

Data Magnet enables data sources from either third-party or VIVOTEK's License Plate Recognition cameras to integrate into VAST 2, providing rapid access to recording data and supporting simultaneous data display during live streaming. Users can also easily customize alarm management to receive precise notifications.

License Plate Recognition Solution

VAST 2 integrates plate information from VIVOTEK's License Plate Recognition cameras. Users can view live, search and display historical data, and export results to efficiently manage parking lots security.

Video Management Software

VAST 2

General

Maximum Number of Cameras	256
Maximum Number of Servers	200
Supported OS	Windows 10, 7 Windows Server 2012, 2016, 2019 (Server Core installation type is not supported) macOS 10.15 Catalina (Client Only)
Supported Mobile App	iViewer (iOS/Android)
Virtual Matrix	Supported (VAST 2 Matrix)

LiveView (Local Display)

Max. Channels	64-channel per Monitor (the max. number of monitors supported depends on the capability of your system)
---------------	---

Video

Video Format	MJPEG, MPEG4, H.264 AVC, H.264 SVC, H.265
--------------	---

Audio

Audio Format	G.711, G.726, AMR, AAC
--------------	------------------------

Record

Additional Recording Time for Event Recording (sec.)	Pre-Record: 3-15, Post-Record: 10-60
Recording Mode	Continuous, Event, Customized Schedule, Activity Adaptive Streaming
Recording File Format	3 GP
External Storage Recording	NAS (SMB/CIFS), iSCSI

Alarm Management

Alarm Period (sec.)	Max. 30
Event	Camera Event, System Event, External Devices Event

Data Magnet

Data Source Type	VIVOTEK License Plate Recognition, Third party data source
Data Display	Separate data section or Data overlay on screen
Search Result Export	.csv / .png file

eMap

Supported Image Format	BMP, GIF, JPG, PNG, SVG
------------------------	-------------------------

Export

Snapshot	PNG & JPEG
Export File	3GP & EXE

Backup

External Storage Backup	NAS (SMB/CIFS), iSCSI
-------------------------	-----------------------

User Management

Authentication	Basic Account/Windows AD Account
----------------	----------------------------------

System

Network	SMTP & HTTPS
macOS Client	Supported*

Device Integration

I/O Box	Advantech ADAM-6000 Series; CHIYU CYT-133SC; MOXA ioLogik E1210, E1211, E1212, and E1214
POS (Add-ons)	POSNET; Lafresh; Allsense (Implement in NVR, Searchable in VAST2)

Camera Integration

Video Source	VIVOTEK, ONVIF & RTSP Streaming
--------------	---------------------------------

VCA Solution

Security Intelligence	Line Crossing Detection, Loitering Detection, Intrusion detection, Face detection, Missing object detection, Unattended object detection, Crowd detection, Smart Tracking
-----------------------	---

Business Intelligence

Business Intelligence	People Counting, Zone Detection
-----------------------	---------------------------------

Add-ons**

Advanced Solutions	Substations Failover Solution, CMS Failover Solution, Transportation Solution, Transaction Solution, 3rd Party Integration Solution
--------------------	---

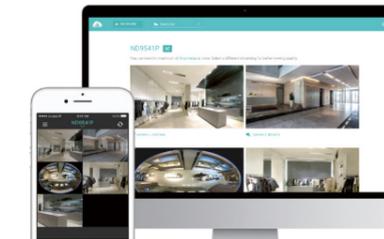

*macOS Client Limitations of macOS Client, please refer to VAST 2 datasheet.
**Add-ons Advanced license is required. (Additional charges may apply)

* All specifications are subject to change without notice.

Cloud Service

VIVOCLOUD/ VIVOCLOUD Retail

VIVOCLOUD provides easy video bridging and tunneling between VIVOTEK NVRs and network cameras, ensuring smooth operation and management from anywhere at any time.

Quick Start

VIVOCLOUD can be carried out by an intuitive app on Android or iOS devices. No more port forwarding, no more VPN setup, simply turn-on VIVOCLOUD service on your VIVOTEK device.

Scale Your Visions with Shared Devices

With an expandable network of up to 16 devices and the ability to share each device to up to 4 VIVOCLOUD accounts, your family members, friends or business colleagues are empowered to monitor security footage or counting reports.

Stay Notified

VIVOCLOUD keeps an eye on the things you value and pushes alerts to your mobile device wherever you are. Furthermore, you can also view notification history. Now you can stop constantly checking live video streams, and just simply check when notifications appear.

Easy Access with Cross Platform

Along with Android and iOS app, VIVOCLOUD supports various web browsers including, Firefox and Google Chrome, both on Windows and Mac.

Cloud Service

Sync Report

VIVOCLOUD Retail supports both the web portal and the standalone app, allowing users to access reports anytime via any device type. All edits of report details will sync to the cloud server, keeping all dashboard information up-to-date across all devices. VIVOCLOUD Retail also supports data comparison and counting report detail down to the minute.

Looking into Data

Single click or tap on the VIVOCLOUD Retail dashboard to see more detailed information. VIVOCLOUD Retail also supports data comparison and counting report detail down to the minute.

Tracking Long-term Performance

Counting data is no longer limited by camera-based flash memory. All counting data will automatically sync to the NVR HDD every hour, and will be preserved for 2 years on free edge data storage. This provides the best way to track long-term performance and streamline your business and to maximize potential.

Solution Integration Alliance

The SIA (Solution Integration Alliance) Program is a strategic alliance that aims to facilitate the integration of VIVOTEK products into leading software or hardware platforms. With the SIA Program, partners have the flexibility to enhance key functionalities when creating an IP surveillance solution. The SIA Program provides programmable Software Development Kits (SDK) to allow partners to develop customized features on an open platform, allowing the highest possible level of integration. VIVOTEK also provides technical support throughout the development process.

Find out more about enrolling in the VIVOTEK SIA Program, please email sia@vivotek.com for more information.
