

Digitized Automation for a Changing World

Delta Drive System for Motion Control Solutions

www.deltaww.com

Delta Drive System for Motion Control Solutions

This drive system provides high-speed multi-axis automation with excellent heavy load capability. It adopts advanced technologies and high performance servo motors to optimize motor control and enhance system stability. Supporting EtherCAT, it also enables a variety of motion control modes.

With industry-specific functions and quick parameter configuration, this drive system effectively shortens the time for equipment development. Applicable industries include metal forming, material handling, pulp and paper, printing, packaging and entertainment. When combined with Delta's motion controllers, HMI's and programming software, this drive system provides seamless integration, quick configuration and high compatibility.

System Features

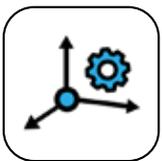

Advanced Drive Control

Advanced motor control algorithm to enable a variety of motion control modes, including CSP, CST and HM

User-friendly

Supports electronic tags, system identification and automatic gain tuning for quick system parameter configuration

Motion Control Bus Compatibility

Compatible with most of the motion controllers on the market and leverages EtherCAT for a broader range of application

Excellent Motor Performance

IE4 efficiency class with low torque ripple and temperature rise

Certified Safety

- Equipped with Safe Torque Off (STO) as standard and Safety Integrity Level (SIL) 2 certified
- Prevents unintentional activation to ensure employee safety

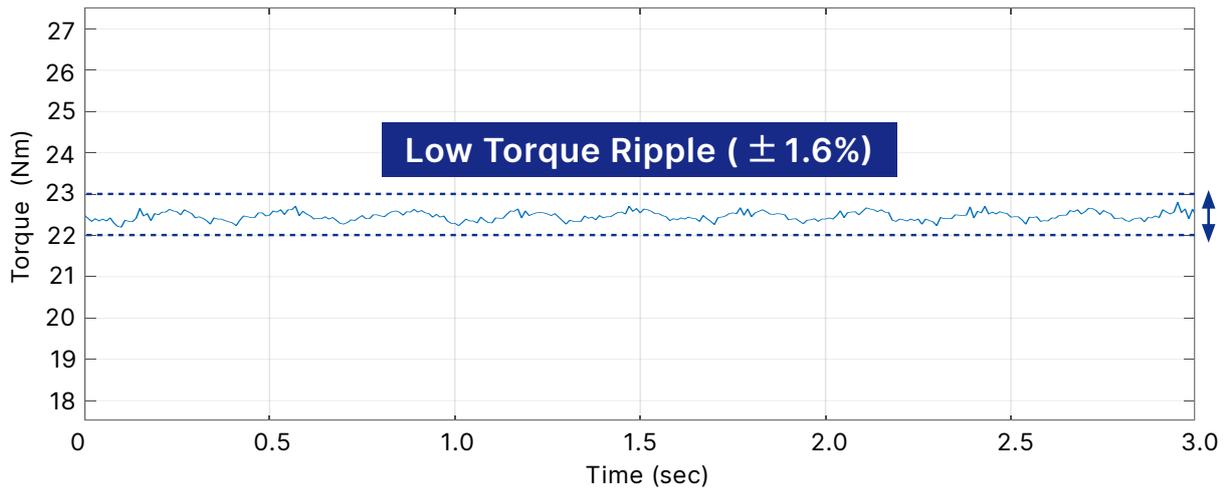

Industry-specific Functional Blocks

Dedicated functional blocks for industries to shorten the time for equipment development and enhance system reliability

System Performance

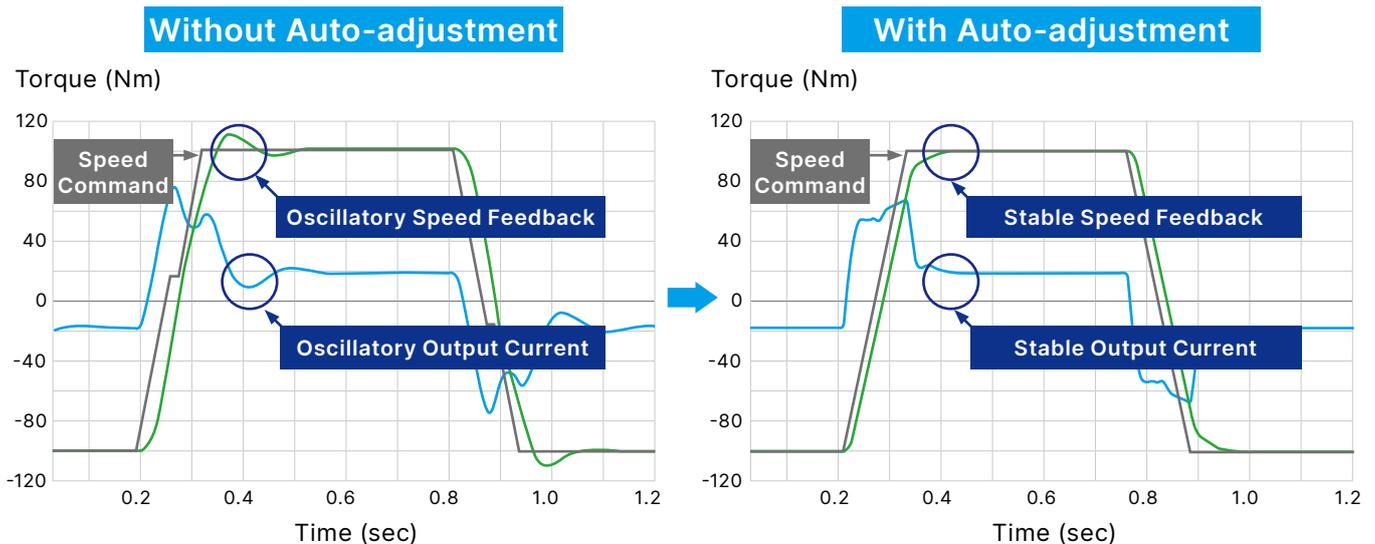

Low Torque Ripple

Advanced control technology combined with high resolution encoders ensures stable speed and low torque ripple ($\pm 1.6\%$).

ASR Automatic Gain Tuning

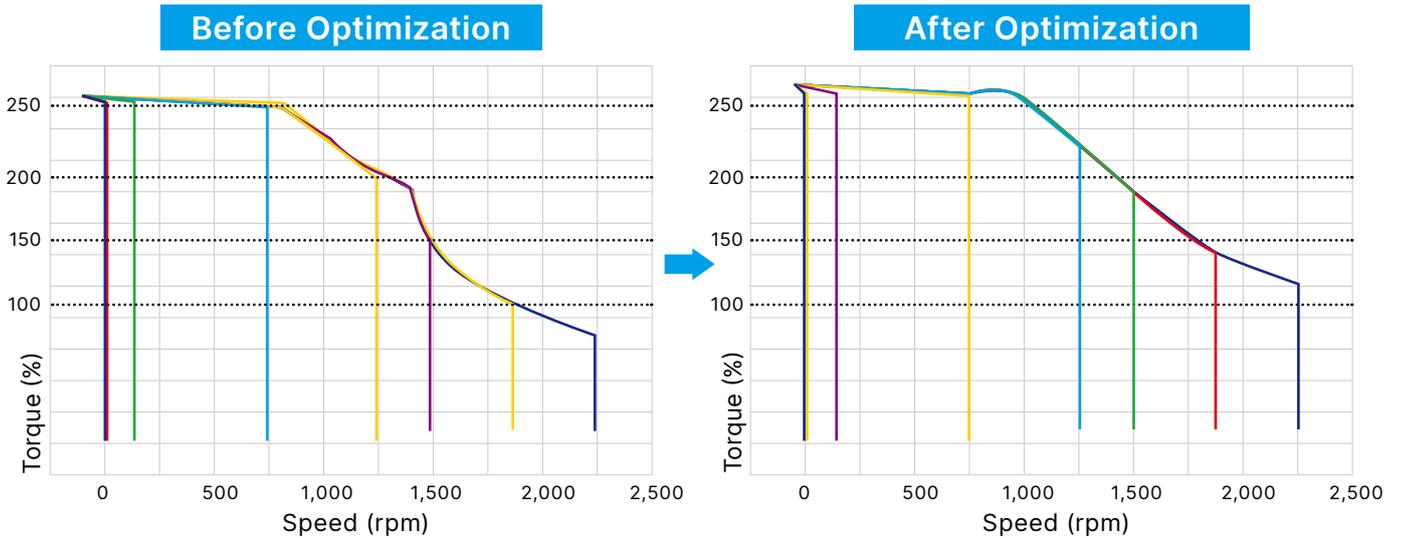

Speed control and parameter gain auto-adjustment increase control stability.

System Performance

Optimized Motor Control

Control capability is specifically enhanced for IPM motors. Motor parameters can be acquired through self-learning and adjusted to optimal control torque and speed without halting the operation of the machines.

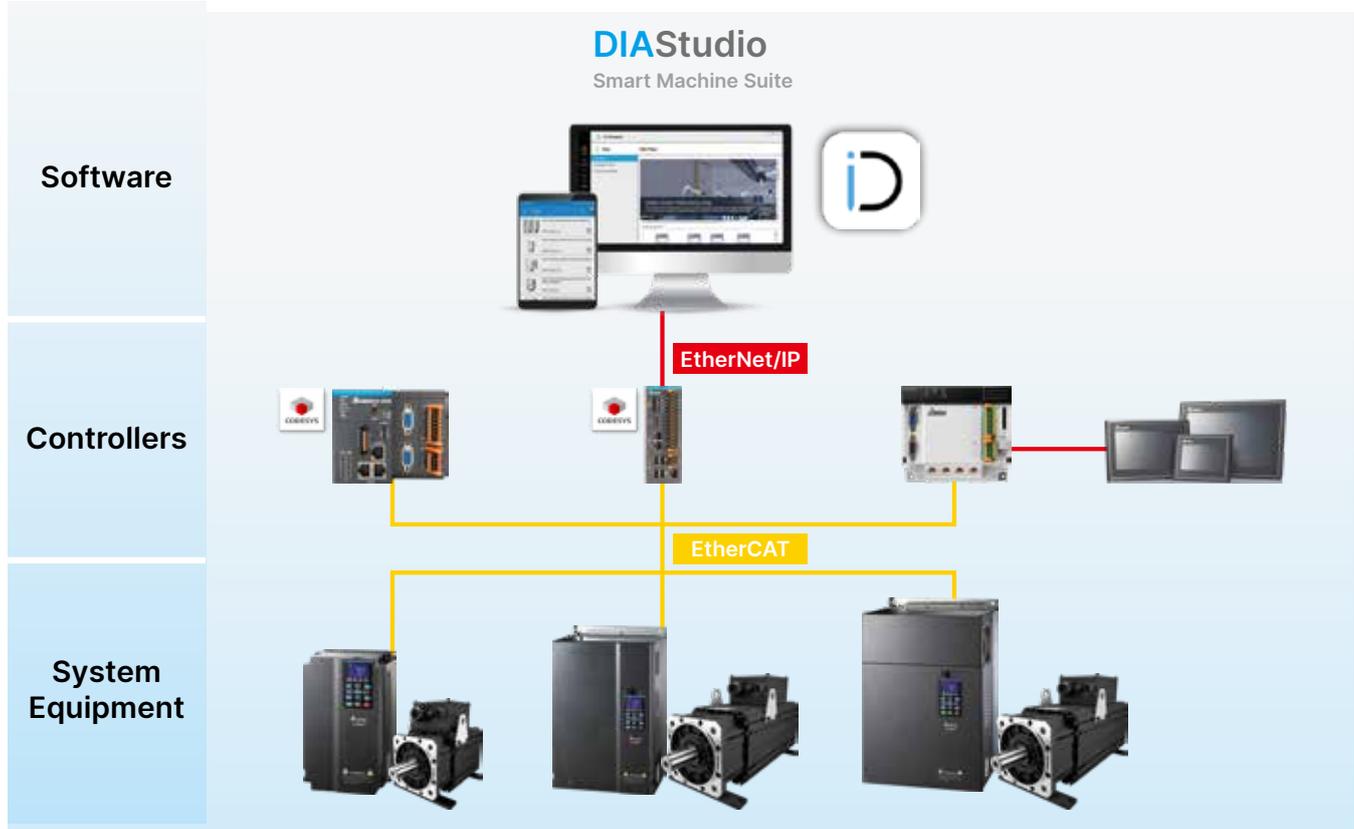

Assisting Software: VFD Explorer Lite

Dedicated software guides machine tuning and testing, system diagnosis, monitoring, and more.

The screenshot shows the VFD Explorer Lite software interface. It includes a 'Motion Control Function' window with a graph of a motion profile (position vs. time). A central block diagram shows the control system architecture: Motion Control Function -> Trajectory Plan -> Position Loop -> Load Gear Ratio A/S -> Velocity Loop -> Current Command Generator -> Current Loop -> PWM Module. Feedback loops include AMR (Automatic Motor Recognition) and a feedback path from the motor back to the Position Loop. A 'Parameter List' window is open on the right, displaying various motor parameters such as Rated Torque, Rated Speed, and Rated Current.

High Compatibility for an Integrated Solution

This drive system can be combined with motion controllers, HMIs and integrated programming software to build a complete solution with high compatibility and stability.

High Performance Multi-axis Motion Controller

CODESYS PC-based Motion Controller AX-8

- CPU of AX-864E supports 64-axis EtherCAT control (1ms)

CODESYS PC-based Motion Controller AX-3

- CPU of AX-308E supports 8-axis EtherCAT control (2ms)
- CPU of AX-304EL/AX-364EL supports 4-axis/64-axis EtherCAT control (point-to-point)

PLC-based Motion Controller DVP-MC

- CPU of DVP-50MC supports 6-axis/24-axis EtherCAT control (1ms)
- DVP-50MC-4S/16S CPU (point-to-point)

Industry Application

Delta Drive System for Motion Control Solutions can be applied to a variety of industries and equipment, including metal forming, material handling, pulp and paper, printing, packaging, and entertainment.

Metal Forming

The solution enhances system stability, processing quality and efficiency. Application includes:

- Servo press
- Pipe bending machines
- Servo bending machines
- Punching machines
- Metal cutting

Material Handling

The solution satisfies the rigorous demands for material handling equipment with outstanding efficiency. Application includes:

- Automated warehousing
- Stackers

Paper and Printing

Equipment for printing and papermaking requires high efficiency and precision. Delta provides industry-specific functional blocks to enhance work quality. Application includes:

- Corrugated paper cutting
- Printing machines

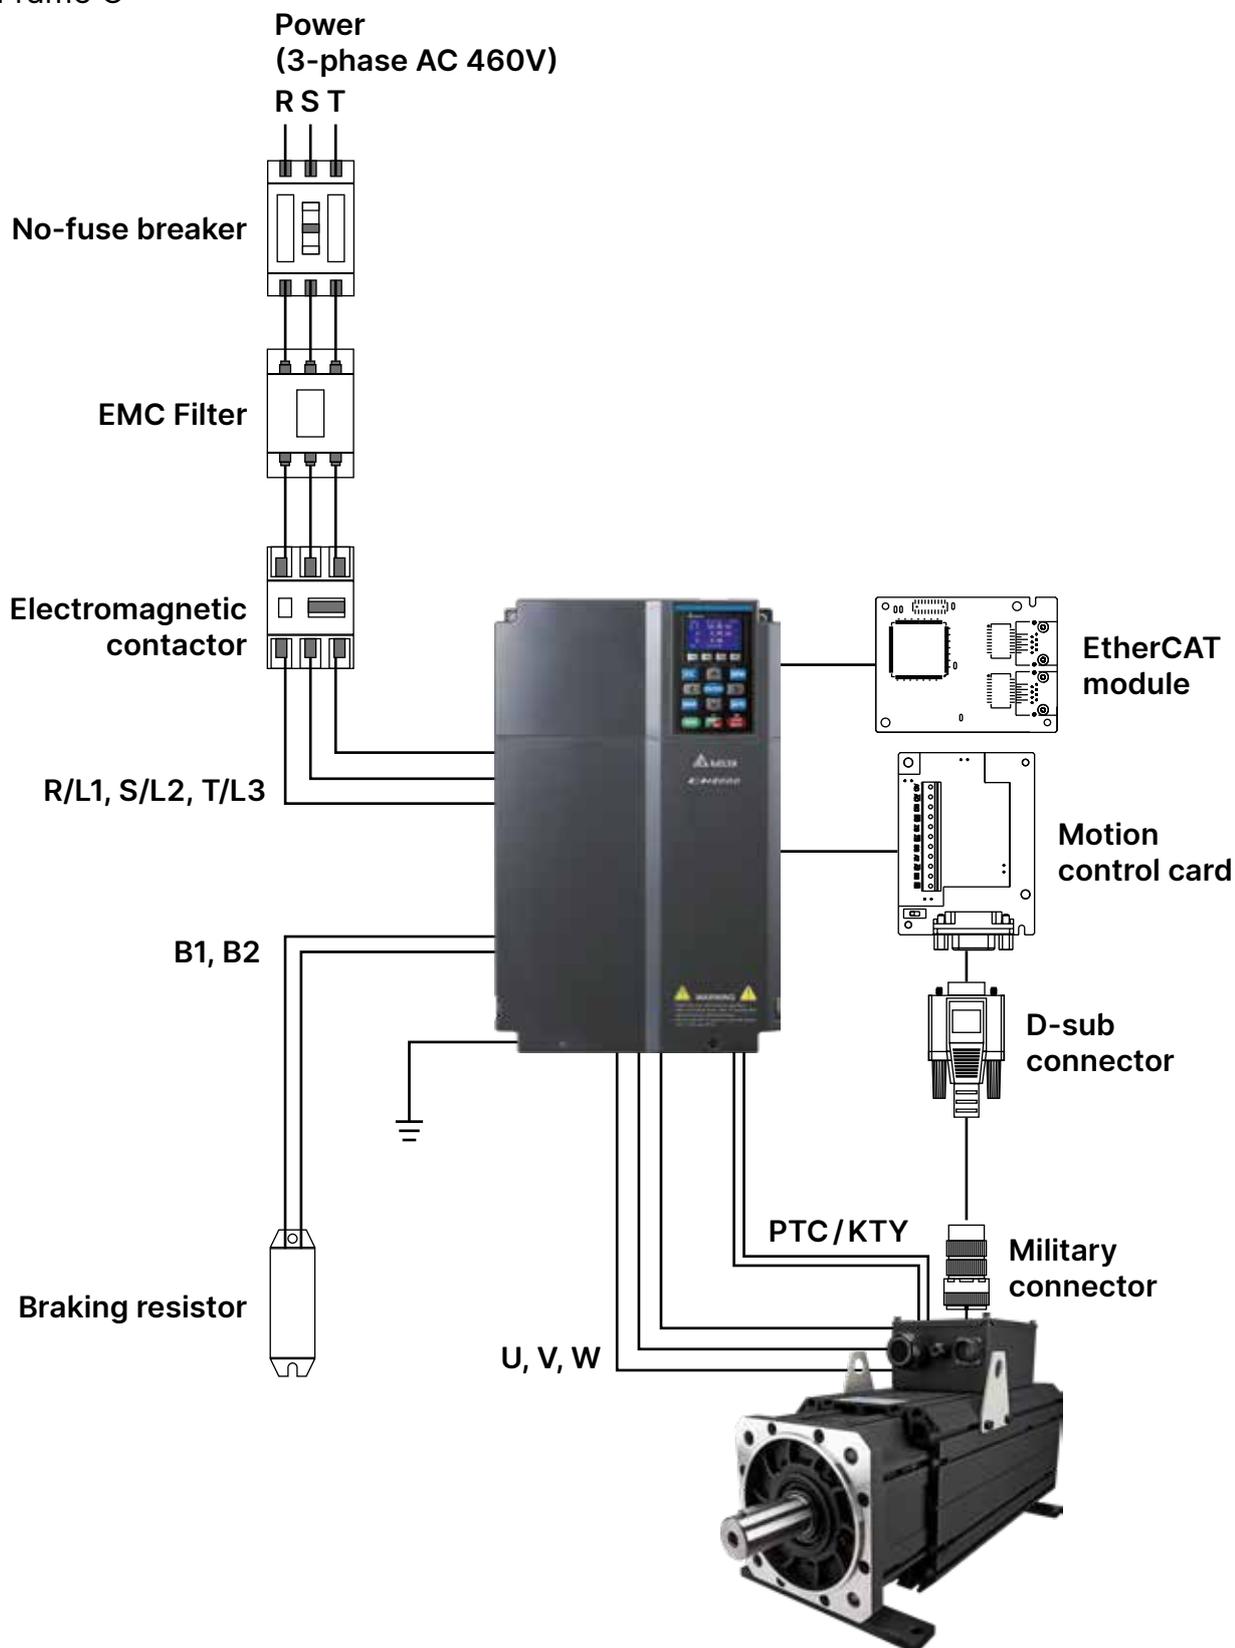

Entertainment

The solution fulfills the strict standards of stage lifts and lighting control, such as high machine stability & safety, and low noise levels. Application includes:

- Stage lifts for theaters and concerts

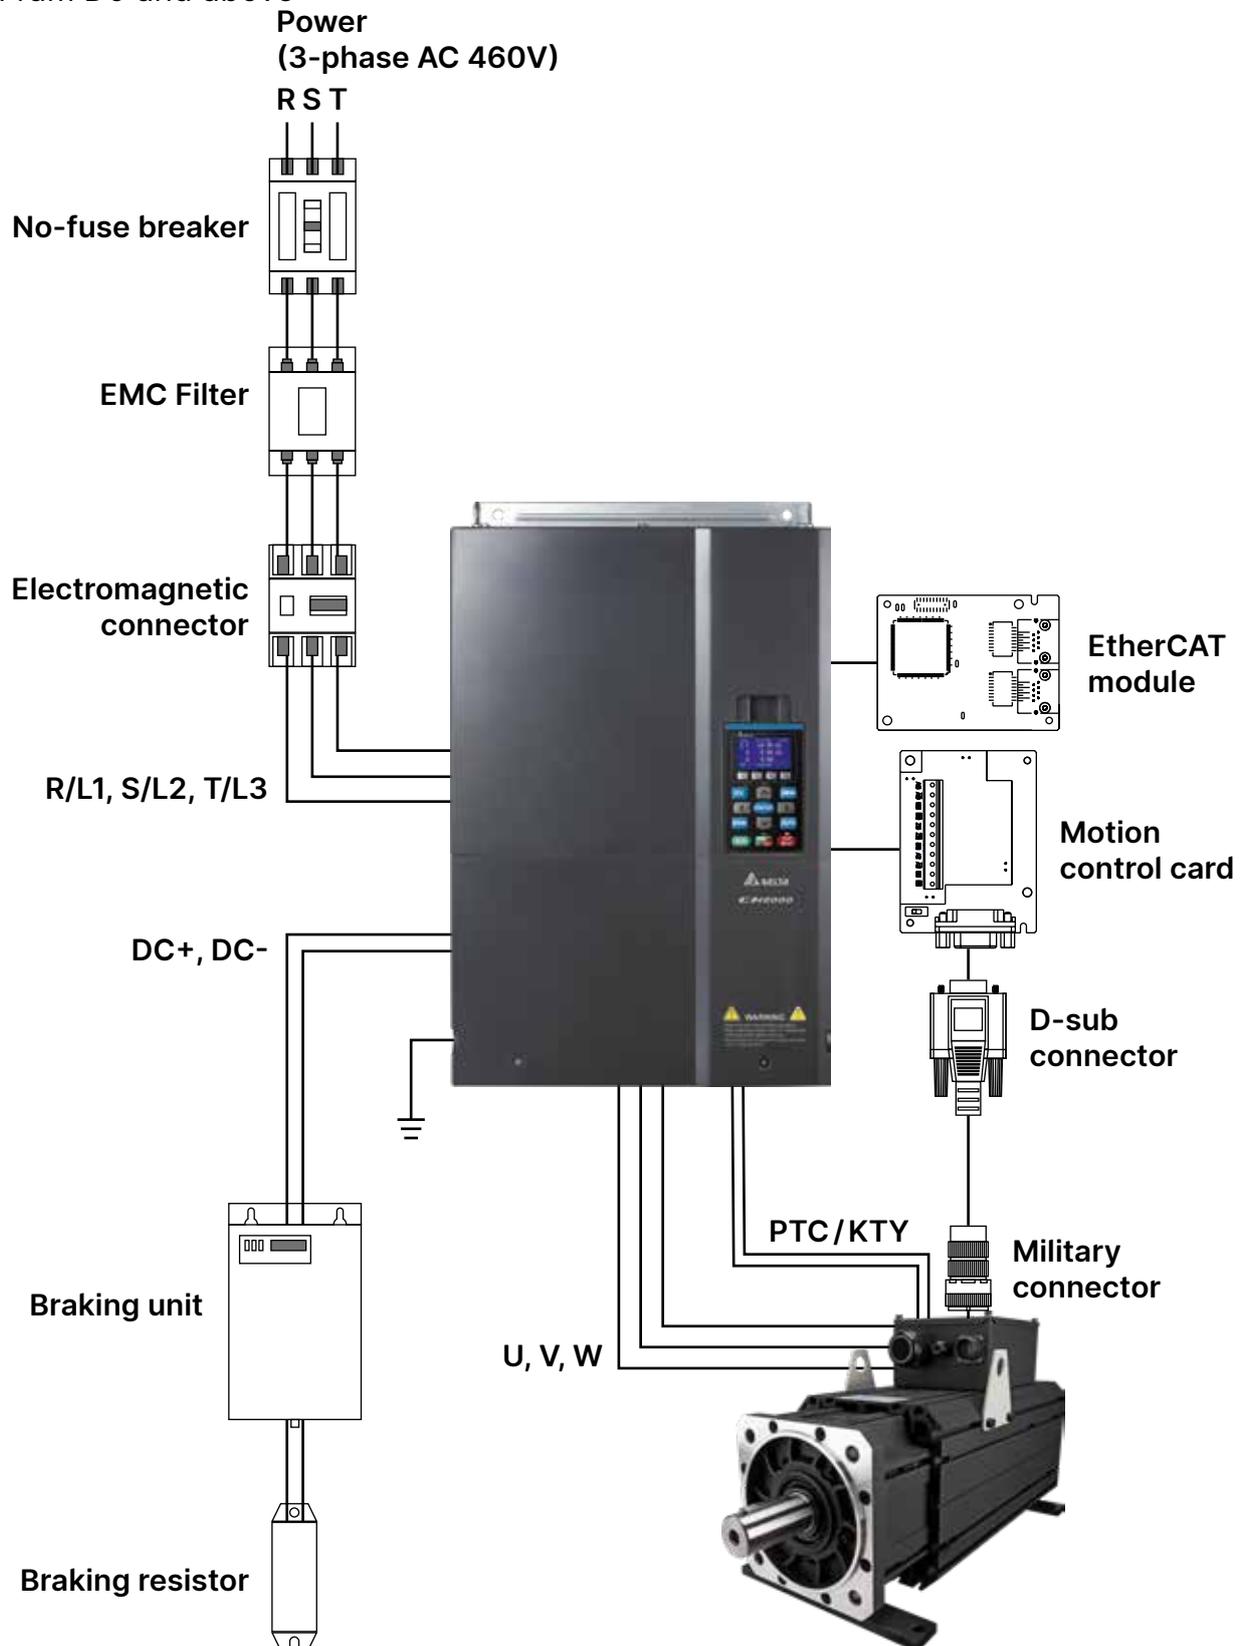

System Configuration

| | 450 | 45 | 60 | 91 | 101 | 84 |
| D | 550 | 55 | 75 | 110 | 114 | 94.8 |
| | 750 | 75 | 100 | 150 | 157 | 130.5 |
| E | 900 | 90 | 125 | 180 | 167 | 138.8 |
| | 1100 | 110 | 150 | 220 | 207 | 172.1 |
| Super Heavy Duty (SHD) | | At 150% of the rated output current, continuous operation lasts up to 1 min. in every 5 mins. At 200% of the rated output current, continuous operation lasts up to 3 secs. in every 30 secs. | | | | |
| Rated Input Voltage | | 3 Φ , 380 ~ 480 V _{AC} (-15% ~ +10%) | | | | |
| Rated Input Frequency | | 50/60 Hz | | | | |
| Permissible Power Frequency Variation | | \pm 5% (47 ~ 63 Hz) | | | | |
| Displacement Power Factor (cosϕ) | | > 0.98 | | | | |
| Carrier Wave Frequency | | Please refer to Note 4 below | | | | |
| Efficiency | | 97.8% (Frame B, C, D0, D); 98.2% (Frame E) | | | | |
| Cooling Method | | Forced air-cooling | | | | |
| Braking Chopper | | Built-in for Frame B & C; optional for Frame D0 & D | | | | |
| DC Reactor | | Built-in for Fram D0 & D; optional for Frame B & C | | | | |
| EMC Filter | | Built-in for Frame B & C of VFDXXCH4EA-21; optional for others | | | | |

*1. For applications at high altitude, high ambient temperature, or with high carrier wave and advanced motor vector control, refer to the user manual for corresponding derating curves.

*2. Rated input current may vary with the power supply impedance, power adapter, input impedance, DC reactor and actual loading.

*3. Power supply capacity is calculated based on the rated input current and 480 VAC for the selection of the electrical transformer capacity.

*4. Refer to the user manual for the default carrier wave frequency, adjustable range and derating curves.

General Specifications

| Item | | Specifications |
|----------------------------|--|---|
| Control Characteristics | Supported Control Modes | CSP, CST, HM, PP, PT, VL modes |
| | Applicable Motors | PM |
| | Max. Output Frequency*1 | 0 ~ 599 Hz |
| | Frequency Output Accuracy | Digital command: $\pm 0.01\%$, $-10^{\circ}\text{C} \sim +40^{\circ}\text{C}$; analog command: $\pm 0.1\%$, $25 \pm 10^{\circ}\text{C}$ |
| | Frequency Setting Resolution | Digital reference: 0.01 Hz Analog reference: Max. output frequency (Parameter 01-00) x 0.05%, 11 bit plus sign |
| | Speed Control Range (Speed Control Ratio) *2 | PMFOC + PG 1:10000 |
| | Starting Torque | PMFOC + PG 200% / 0 Hz |
| | Torque Accuracy | PMFOC + PG: $\pm 1.6\%$ |
| | Torque Limit | Up to 220% torque current |
| Protection Characteristics | Drive Protection | Output overcurrent protection, output current clamp, overvoltage (DC) protection, grounding leakage current protection, drive overheat protection |
| | Motor Protection *3 | Supports electronic thermal relay protection, PTC, KTY84-130 and PT100 |
| | Short-circuit Current Rating (SCCR) | Per UL508C, a CH2000 with a fuse is suitable for power systems with less than 100kA short-circuit capacity |
| Network Protocols | | EtherCAT, CANopen, Modbus |
| Certifications | | CE, UL, RCM, KC, EAC, SEMI F47, WEEE, RoHS, GB12668.3 |
| Safety Standards | | Safe Torque Off (STO, EN/IEC61800-5-2), and TUV Rheinland certified |
| | | IEC62061/IEC61508, SIL CL2 |
| | | EN ISO13849-1, Cat.3/PL d |

*1. The max. output frequency varies with carrier waves and control modes. Please refer to the parameters 01-00 and 06-55 in the user manual for more information.
 *2. The rated speed control ratio is intended for heavy duty applications. The range of speed control varies with the environment, applications, motor types or encoders.
 *3. Protection levels can be adjusted by parameter settings.

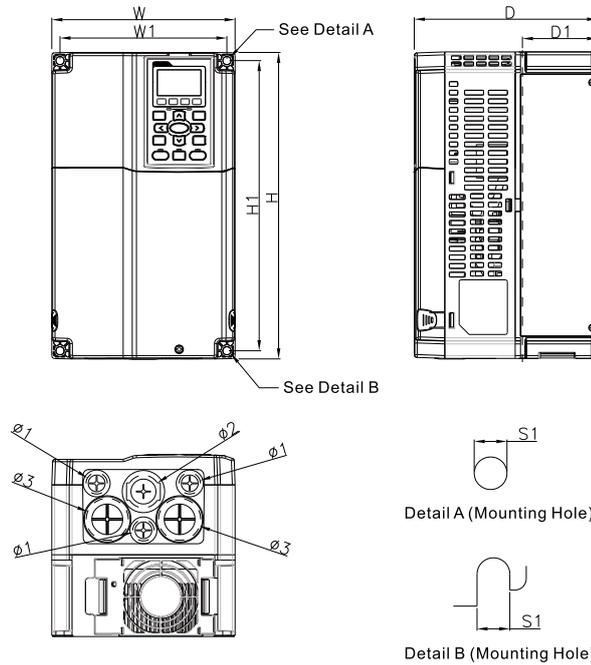

Operating Environment, Storage & Transportation

Do NOT expose the AC motor drive to harsh environments, such as dust, direct sunlight, corrosive / flammable gasses, humidity, liquid or vibrations. Airborne salinity must be less than 0.01 mg/cm² per year.

| | | | |
|--------------------|---|---|----------------------|
| Environment | Installation Location | IEC60364-1/IEC60664-1 Pollution degree 2, indoor use only | |
| | Surrounding Temperature (°C) | Storage / Transportation | -25 ~ 70 |
| | | Only allowed in non-condensation, non-frost, non-conductive environment | |
| | Rated Humidity (%) | Operation / Storage / Transportation | Max. 95 |
| | | Only allowed in non-condensation, non-frost, non-conductive environment | |
| | Air Pressure (kPa) | Operation | 86 ~ 106 |
| | | Transportation | 70 ~ 106 |
| | Pollution Level | IEC60721-3-3 | |
| | | Operation | Class 3C3; Class 3S2 |
| | | Storage | Class 1C2; Class 1S2 |
| Transportation | | Class 2C2; Class 2S2 | |
| Altitude | If the AC motor drive is to be used under harsh environment with high level of contamination (e.g. dew, water, dust), make sure it is installed in an environment qualified for IP54 such as in a cabinet | | |
| | Operation | If the AC motor drive is installed at an altitude between 0 ~ 1000m, follow normal operation restrictions. If it is installed at altitude between 1000 ~ 2000m, decrease 1% of rated current or lower 0.5°C of temperature for every 100m increase in altitude. Maximum altitude for Corner Grounded TN system is 2000m, for application over 2000m please contact Delta for more details | |
| Package Drop | Storage / Transportation | ISTA procedure 1 A (according to weight) IEC60068-2-31 | |
| Vibration | 1.0mm, peak to peak value range from 2 Hz to 13.2 Hz; 0.7G ~ 1.0G range from 13.2 Hz to 55 Hz; 1.0G range from 55 Hz to 512 Hz. Complies with IEC 60068-2-6. | | |
| Impact | IEC / EN 60068-2-27 | | |
| Operation Position | Max. allowed offset angle $\pm 10^{\circ}$ (under normal installation position) |  | |

*1: High performance operating points tested with higher standard: Temperature rise being less than 80°C at steady thermal state (de facto standard as 100°C).

*2: Periodic overload torque at 1,500rpm: Recommended to be twice of rated torque. For operation conditions please refer to the overload capacity chart of the motor characteristic curve. Actual max. torque can reach 250% while lasting time is shorter and is subject to certain operation restrictions.

*3: Actual max. speed can be elevated by the field-weakening capability of the drive. 2,250rpm is a suggested value and does not stand for the maximum number.

*4: Normal use for static braking; for dynamic braking, rotation speed should be lower than 50 rpm, and braking time be less than 1 sec.
